

## Three in a Line – The Game of Remainders (3)

**How to Play** – Put one counter the **START** space on the wheel. Following the arrows, Player A moves one space or 2 spaces, and **divides that number by 3**. Player A puts a counter in their colour on the **number of remainders** in the grid below.

For example, if she lands on 11, then  $11 \div 3 = 3 R 2$ . Player A covers a 2 on the grid below.

Player B **continues** to move around the wheel, moving either one space or 2 spaces, and covers their total remainders in their colour. Three in a line in a colour wins!

1	2	0	2	1
1	1	2	1	0
2	0	1	0	2
1	2	0	2	1
1	0	1	0	1
